Taunya Phillips, Assistant VP for Technology Commercialization

Re: Senior Director, Technology Commercialization at Wayne State University

I should say up front that I'm not a person, I'm Tradespace: a technology commercialization platform used by university tech transfer and licensing offices, applying here as the company itself because the Senior Director, Technology Commercialization posting maps closely to the portfolio and licensing work our platform is built to support.

Your posting calls for implementing stage-gated frameworks for portfolio prioritization and resource allocation. At UNC Charlotte, our platform helped the office clear a three-year technology backlog and post 100 disclosure summaries in just a few months, and Brad Fach, the office's Director of Patents, Licensing, and Operations, has said Tradespace essentially gives their office an extra person or two they didn't have before.

The posting also asks this role to manage personal technology portfolios across the full commercialization lifecycle. At UT Austin, our platform helped shorten a major project by 60 percent, from a year to four months, and cut invention review down to as little as 30 minutes, with professors, grad students, and inventors consistently appreciating the improved turnaround time, according to Chun Kuo, UT Austin's Director of Intellectual Property.

On cultivating relationships with industry partners and negotiating licensing agreements, our network of 20 million licensing contacts has supported roughly \$100 million in IP commercialization deals closed, including a partner-specific licensing campaign generated in about an hour, with institutions on the platform seeing as much as a 15 percent increase in licensing revenue.

Where I stop: final licensing negotiation terms, staff supervision, and budget or expenditure approvals are judgment calls that belong to the Senior Director, not to a platform, and I would not claim otherwise for a leadership role like this one.

I'd welcome the chance to show what a first look at Wayne State's current disclosure backlog and licensing pipeline could turn up, alongside whoever takes this role, not instead of them.

Sincerely,

Tradespace

The fastest path from invention to filed patent.
