

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Senior Patent & IP Counsel at Lyten (San Jose, CA / remote eligible)

SUMMARY

Tradespace is a network of 235+ patent attorneys and an AI-assisted invention capture and prosecution platform, applying as the company itself rather than as an individual candidate. We support in-house IP teams the way an embedded outside counsel bench and drafting platform would: taking on the volume work of disclosure intake, prior art and market reporting, and provisional drafting support so a Senior Patent & IP Counsel can spend more time on claim strategy and portfolio judgment calls.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called “game-changing” from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same “which three patents protect the core product” question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Invention disclosure and prosecution workflow: at Enveda Biosciences we replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work, migrating the full legacy portfolio in 30 minutes so the review and prosecution workflow this role owns starts from a clean system of record rather than a backlog.
- Filing throughput and outside counsel management: for one R&D client, pairing with a senior attorney matched by technology cut turnaround from six weeks to five days and cost by \$15,000 per utility filing, the same kind of budget and outside counsel oversight this role is responsible for across Lyten's patent portfolio.
- Competitive landscape and prior art work behind patent strategy and claim decisions: our AI-assisted prior art and market reporting and AI-drafting support for provisional filings give counsel a faster first pass on the landscape and filing prioritization this role leads, with the claim strategy and legal judgment staying with counsel.

WHERE I STOP

Freedom-to-operate opinions, final claim scope calls, and licensing negotiation strategy stay with counsel. Tradespace speeds up the prior art review, disclosure intake, and provisional drafting support that feed those decisions; it does not make the decisions itself, and we would not claim otherwise for a role this senior.
