

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Senior Licensing Officer (0339U), Technology Licensing at UC Berkeley (Berkeley, CA)

SUMMARY

Tradespace is a technology commercialization platform used by university tech transfer and licensing offices, applying as the company itself rather than as an individual candidate. We support licensing officers the way an extra team member would, helping manage large case portfolios, speed up review, and reach industrial partners faster, so a Senior Licensing Officer can spend more time on strategy and negotiation.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called "game-changing" from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same "which three patents protect the core product" question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Managing a large portfolio of cases: at UNC Charlotte, our platform helped the office clear a three-year technology backlog and post 100 disclosure summaries in just a few months. Brad Fach, the office's Director of Patents, Licensing, and Operations, has said Tradespace essentially gives their office an extra person or two they didn't have before, relevant to this role's responsibility for a large portfolio of cases in the biology, chemistry, and biotechnology areas.
- Faster assessment of patentability and commercialization strategy: at UT Austin, our platform helped shorten a major project by 60 percent, from a year to four months, and cut invention review down to as little as 30 minutes. Chun Kuo, UT Austin's Director of Intellectual Property, has said professors, grad students, and inventors consistently appreciate the improved turnaround time, which speaks directly to this role's work formulating licensing strategy for complex patent portfolios.
- Marketing technology to industrial partners: across our network of 20 million licensing contacts, partners have closed roughly \$100 million in IP commercialization deals and generated a partner-specific licensing campaign in about an hour, with institutions on the platform seeing as much as a 15 percent increase in licensing revenue, relevant to this role's work marketing technology to industrial partners and supporting startups.

WHERE I STOP

Patentability judgment, licensee compliance enforcement decisions, and final agreement terms stay with the Licensing Officer. Tradespace helps with portfolio triage, faster case review, and outbound licensing marketing; it does not make the legal or negotiation calls this role is hired to make.
