

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Senior Director, Technology Commercialization at Wayne State University (Detroit, MI)

SUMMARY

Tradespace is a technology commercialization platform used by university tech transfer offices, applying as the company itself rather than as an individual candidate. We support commercialization leaders the way an extra team member would, helping clear disclosure backlogs, speed up invention review, and reach licensing partners faster, so a Senior Director can spend more time on portfolio strategy and industry relationships rather than manual case triage.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called "game-changing" from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same "which three patents protect the core product" question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Portfolio prioritization at scale: at UNC Charlotte, our platform helped the office clear a three-year technology backlog and post 100 disclosure summaries in just a few months. Brad Fach, the office's Director of Patents, Licensing, and Operations, has said Tradespace essentially gives their office an extra person or two they didn't have before, directly relevant to this role's stage-gated portfolio prioritization work.
- Faster invention review across the commercialization lifecycle: at UT Austin, our platform helped shorten a major project by 60 percent, from a year to four months, and cut invention review down to as little as 30 minutes. Chun Kuo, UT Austin's Director of Intellectual Property, has said professors, grad students, and inventors consistently appreciate the improved turnaround time, which speaks to this role's responsibility for personal technology portfolios across the full commercialization lifecycle.
- Reaching licensing partners and growing licensing revenue: across our network of 20 million licensing contacts, partners have closed roughly \$100 million in IP commercialization deals, generated a partner-specific licensing campaign in about an hour, and seen as much as a 15 percent increase in licensing revenue, relevant to this role's work cultivating relationships with industry partners and negotiating licensing agreements.

WHERE I STOP

Final licensing negotiation terms, staff supervision, and budget and expenditure approvals stay with the Senior Director. Tradespace helps with portfolio triage, faster invention review, and reaching licensing partners; it does not manage people or make the deal-term calls this role is hired to make.
