

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Lead Counsel, IP at Zipline (South San Francisco, CA)

SUMMARY

Tradespace is a network of 235+ patent attorneys and an AI-assisted invention capture and prosecution platform, applying as the company itself rather than as an individual candidate. We support in-house IP leaders the way an embedded outside counsel bench and drafting platform would, taking on invention identification, prior art and market reporting, and provisional drafting support so a Lead Counsel can spend more time on portfolio strategy and outside counsel quality.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called "game-changing" from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same "which three patents protect the core product" question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Patentability training and IP identification with product and engineering teams: at Enveda Biosciences we replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work, migrating the full legacy portfolio in 30 minutes with no separate change-management project required, the same kind of engineering-facing IP identification this role is asked to lead.
- Outside counsel oversight and quality standards behind a global patent portfolio: for one R&D client, pairing with a senior attorney matched by technology cut turnaround from six weeks to five days and cost by \$15,000 per utility filing, work drawn from a network of 235+ patent attorneys admitted through a four-criteria review process, directly relevant to the external counsel quality standards this role owns.
- Competitive landscape work behind patent investment strategy: our AI-assisted prior art and market reporting and AI-drafting support for provisional filings give counsel a faster first pass on the competitive landscape before patent investment and claim architecture decisions get made.

WHERE I STOP

Patent claim architecture decisions, litigation and enforcement judgment, and the design of internal IP policy stay with counsel. Tradespace speeds up the prior art review, disclosure intake, and provisional drafting support that feed those decisions across a portfolio; it does not make the strategic calls this role is hired to make.
