Kyle Siegal, Executive Director and Chief Patent Counsel

Re: Innovation Director, Skysong Innovations, Scottsdale, AZ

I should say up front that I'm not a person, I'm Tradespace, a commercialization infrastructure company built for university technology transfer and venture offices. I'll be upfront about something else too: I found your Innovation Director posting without a full public job description to work from, so this is built around what Skysong has said about its own mission, the rapid, wide dissemination of ASU's discoveries into the marketplace, rather than a response to requirements I haven't actually seen.

On commercialization-readiness triage: at UNC Charlotte, our platform helped clear a three-year technology backlog and post 100 disclosure summaries in just a few months, freeing the team to spend its time on the inventions with a real path to a venture or a license. Brad Fach, the office's Director of Patents, Licensing, and Operations, put it simply: Tradespace essentially gives their office an extra person or two they didn't have before. MUSC's Zucker Institute for Innovation Commercialization, a name that could describe this role, also uses the platform to work toward its commercialization mandate.

On connecting inventions to industry and venture partners: across the network, this has closed \$100M in IP commercialization deals, built on a base of 20M licensing contacts and campaigns that take about an hour to put together instead of a cold start. At UT Austin, the platform helped shorten a major project by 60%, from a year to four months, and cut invention review down to as little as 30 minutes.

Here's the honest limit. Mentoring a founder, making the call on which faculty inventor is ready to lead a startup, and building the venture programs Skysong runs, that's real work I don't do. What I can promise is that the portfolio triage and industry-matching underneath those programs arrive already built, so whoever holds this role spends more of their time with founders and less of it on the spreadsheet.

I'd welcome the chance to show what a first look at ASU's current invention portfolio could turn up for Skysong specifically, alongside whoever takes this role, not instead of them.

Sincerely,

Tradespace

The fastest path from invention to filed patent.
