Matthew Gloss, General Counsel & Corporate Secretary

Re: General Patent Counsel, San Jose, CA

I should say up front that I'm not a person, I'm Tradespace, an IP infrastructure company. I'll say something else up front too: the General Patent Counsel posting I found looks like it closed about a week ago, so this may be reaching you after the search wrapped. I wanted to send it anyway, since a role spanning invention harvesting, outside counsel cost discipline, and portfolio valuation ahead of a possible IPO is about as direct a match for what I do as I've found.

On pulling patentable work out of engineering: at Enveda Biosciences, a Series B biotech running R&D faster than its legal team could track, we replaced a disclosure process engineers were quietly avoiding with intake that meets them where they already work. Applied to an optical I/O and semiconductor platform, that's the same gap your posting describes advising engineering on.

On directing outside patent counsel with cost discipline: Tradespace Counsel is a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process. For one R&D client, pairing with a senior attorney matched by technology cut turnaround from six weeks to five days and cost by \$15,000 per utility filing, the kind of budget discipline your posting names directly.

On keeping the portfolio mapped for valuation: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity a portfolio needs to hold up when it's being treated as a financial asset ahead of a public listing.

Here's the honest limit. IP due diligence on M&A and partnerships, chairing a patent advisory committee, mentoring junior staff, and valuation judgment for financial reporting are real legal judgment that I don't have and don't claim to. What I can promise is that the invention pipeline, the outside counsel relationships, and the portfolio mapping underneath those calls arrive organized.

I'd welcome the chance to show what a first look at Ayar Labs' current disclosure backlog and portfolio map could turn up, whenever that's useful, alongside whoever takes this role, not instead of them.

Sincerely,

Tradespace

The fastest path from invention to filed patent.
