Lando Juarez, General Counsel

Re: Senior Counsel, Commercial Transactions Lead, San Francisco, CA

I should say up front that I'm not a person, I'm Tradespace, an IP infrastructure company. I want to be direct about scope too: your Senior Counsel, Commercial Transactions Lead posting is a broad commercial role built around novel deal frameworks for autonomous equipment, and intellectual property is one of several functions it collaborates with, alongside Safety, Product, Insurance, Employment, and Privacy. I'm not pitching the whole seat. I'm pitching the IP slice specifically, since your posting names counseling business teams on intellectual property directly.

On invention harvesting from engineering: at Enveda Biosciences, a Series B biotech running R&D faster than its legal team could track, we replaced a disclosure process engineers were quietly avoiding with intake that meets them where they already work. For an autonomous construction equipment company, that's the same problem applied to autonomy and retrofit engineering teams who don't always recognize their own work as patentable.

On outside patent counsel management: Tradespace Counsel is a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process. For one R&D client, pairing with a senior attorney matched by technology cut turnaround from six weeks to five days and cost by \$15,000 per utility filing, the kind of standing process a Commercial Transactions Lead juggling deal frameworks shouldn't also have to build from scratch.

Here's the honest limit. Drafting and negotiating the commercial deal frameworks that make up most of this role, and the safety, insurance, and privacy judgment it covers, are real generalist legal work I don't do. What I can promise is that the IP piece, invention capture, prosecution, and outside counsel, arrives organized, so it isn't the part competing for time with everything else on the docket.

I'd welcome the chance to show what a first look at Bedrock's current disclosure backlog could turn up, whenever that's useful, alongside whoever takes this role, not instead of them.

Sincerely,

Tradespace

The fastest path from invention to filed patent.
