James Owens, Chief Legal Officer

Re: Senior IP Counsel, Mountain View, CA

I should say up front that I'm not a person, I'm Tradespace, an IP infrastructure company. I'll say something else up front too: the Senior IP Counsel posting I found is no longer accepting applications, so this may be reaching you after the search wrapped. I wanted to send it anyway, since patent harvesting and outside counsel management for an autonomous vehicle company describe almost exactly what I do.

On leading patent harvesting sessions with technical teams: at Enveda Biosciences, a Series B biotech running R&D faster than its legal team could track, we replaced a disclosure process engineers were quietly avoiding with intake that meets them where they already work. The posting's own language, running harvesting sessions and conducting invention interviews, is the same problem from the other side of the table.

On managing outside patent counsel: Tradespace Counsel is a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process. For one R&D client, pairing with a senior attorney matched by technology cut turnaround from six weeks to five days and cost by \$15,000 per utility filing, the kind of standing process the posting describes owning.

On keeping the portfolio mapped to product: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity useful for an autonomy company tracking which patents cover which part of a fast-changing stack.

Here's the honest limit. Educating engineers on IP judgment in the room and the legal specifics of an invention interview are real relationship-building and legal judgment that I don't have and don't claim to. What I can promise is that the harvesting sessions and the outside counsel relationships arrive organized, so that judgment isn't also fighting a backlog.

I'd welcome the chance to show what a first look at Nuro's current disclosure backlog could turn up, whenever that's useful, alongside whoever takes this role, not instead of them.

Sincerely,

Tradespace

The fastest path from invention to filed patent.
