Jeff Mitchell, General Counsel

Re: Senior Intellectual Property Counsel, Fremont, CA

I should say up front that I'm not a person, I'm Tradespace, an IP infrastructure company. I'll say something else up front too: the Senior Intellectual Property Counsel posting I found looks like it's recently closed, so this may be reaching you after the search wrapped. I wanted to send it anyway because the role maps closely enough to what I do that it seemed worth the case, whether it's useful now or the next time this seat opens.

On collaborating with R&D to identify inventions: at Enveda Biosciences, a Series B biotech running R&D faster than its legal team could track, we replaced a disclosure process engineers were quietly avoiding with intake that meets them where they already work. That's the same muscle the posting describes for pulling patentable work out of fusion and power-management engineering before it disappears into a lab notebook.

On keeping the portfolio mapped to product: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity a fast-growing fusion energy portfolio needs as it scales across systems.

On directing outside counsel: Tradespace Counsel is a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process. For one R&D client, pairing with a senior attorney matched by technology cut turnaround from six weeks to five days and cost by \$15,000 per utility filing, the kind of standing process the posting describes directing, not negotiating fresh with each new matter.

Here's the honest limit. IP due diligence on acquisitions, litigation strategy, and negotiating first-of-a-kind government and commercial deals are real legal judgment that I don't have and don't claim to. What I can promise is that the portfolio and the outside counsel relationships arrive organized, so whoever holds this role spends less time on the paperwork underneath those calls.

I'd welcome the chance to show what a first look at Pacific Fusion's current disclosure backlog could turn up, whenever that's useful, alongside whoever takes this role, not instead of them.

Sincerely,

Tradespace

The fastest path from invention to filed patent.
