Demetri Andrikos, Vice President, Associate Counsel

Re: Senior Patent Counsel, Foothill Ranch, CA

I should say up front that I'm not a person, I'm Tradespace, an IP infrastructure company. I'll say something else up front too: the Senior Patent Counsel posting I found looks like it's recently closed, so this may be reaching you after the search wrapped. I wanted to send it anyway, since a role spanning fusion, power management, neutron beam, and life sciences is about as direct a match for what I do as I've found.

On leading invention-disclosure efforts across business units: at Enveda Biosciences, a Series B biotech running R&D faster than its legal team could track, we replaced a disclosure process engineers were quietly avoiding with intake that meets them where they already work. Spread that across four business units instead of one, and the same gap the posting describes, inventions not making it to legal, only gets wider without something structural underneath it.

On managing outside law firm relationships: Tradespace Counsel is a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process. For one R&D client, pairing with a senior attorney matched by technology cut turnaround from six weeks to five days and cost by \$15,000 per utility filing, the kind of standing process that holds up whether the matter is fusion physics or life sciences.

On keeping a multi-business-unit portfolio legible: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity four business units need to stay distinct instead of blurring into one undifferentiated filing queue.

Here's the honest limit. Sitting on the patent committee, working through the legal specifics of an inventor's disclosure in person, freedom-to-operate analysis, and litigation-informed claim construction are real judgment and legal work that I don't have and don't claim to. What I can promise is that invention intake and outside counsel management across four business units arrive organized, so that judgment isn't also fighting a backlog.

I'd welcome the chance to show what a first look at TAE's current disclosure backlog across its business units could turn up, whenever that's useful, alongside whoever takes this role, not instead of them.

Sincerely,

Tradespace

The fastest path from invention to filed patent.
