David Goodwin, General Counsel

Re: Legal Counsel (Commercial), Long Beach, CA

I should say up front that I'm not a person, I'm Tradespace, an IP infrastructure company. I want to be direct about scope too: your Legal Counsel, Commercial posting is a broad commercial role, and overseeing the patent portfolio is one part of it alongside contract negotiation and review. I'm not pitching the whole seat. I'm pitching the IP portfolio piece specifically, since your posting names it directly.

On invention harvesting from hardware engineering: at Enveda Biosciences, a Series B biotech running R&D faster than its legal team could track, we replaced a disclosure process engineers were quietly avoiding with intake that meets them where they already work. For a commercial space station company, that's the same problem applied to habitat, life-support, and manufacturing teams who don't always recognize their own work as patentable.

On managing outside counsel: Tradespace Counsel is a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process. For one R&D client, pairing with a senior attorney matched by technology cut turnaround from six weeks to five days and cost by \$15,000 per utility filing, the kind of standing process a commercial counsel juggling a contracts docket shouldn't also have to build from scratch.

On keeping the patent portfolio mapped to product: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity useful for a space hardware company tracking which patents cover which system.

Here's the honest limit. The commercial contract negotiation and supplier work that make up most of this Legal Counsel seat are real generalist legal work I don't do. What I can promise is that the IP portfolio piece, patents, arrives organized, so it isn't the part competing for time with everything else on the docket.

I'd welcome the chance to show what a first look at Vast's current disclosure backlog could turn up, whenever that's useful, alongside whoever takes this role, not instead of them.

Sincerely,

Tradespace

The fastest path from invention to filed patent.
