

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Legal Counsel, Intellectual Property, Crusoe Energy, Denver, CO

SUMMARY

IP infrastructure built for exactly what this role owns: pulling patentable work out of AI infrastructure engineering, directing outside counsel on patent strategy, and keeping the portfolio mapped clearly for an AI infrastructure company moving fast.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called “game-changing” from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same “which three patents protect the core product” question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Invention harvesting from AI infrastructure engineering: structured, low-friction intake built for pulling patentable work out of engineers building data center and compute infrastructure who don't always recognize their own work as inventive.
- Outside patent counsel management: a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process, so managing outside counsel on patent strategy and portfolio management is a standing process rather than a relationship built firm by firm.
- AI-assisted prior art and market reporting: built to help a patent strategy function keep pace with disclosures and prior art at the speed AI infrastructure engineering actually generates them, freeing time for the open-source governance and licensing work this role also owns.

WHERE I STOP

AI and ML-generated-content IP legal analysis, negotiating cross-licenses and joint development agreements, and litigation strategy, that's legal judgment I don't have and don't claim to. What I can do is make sure the invention pipeline and the outside counsel relationships arrive organized.
