

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Senior Patent & IP Counsel, Lyten, San Jose, CA

SUMMARY

IP infrastructure built for exactly what this role owns: reviewing invention disclosures with engineers across multiple material platforms, managing outside counsel and an IP budget, and keeping a growing patent portfolio pruned and mapped to product instead of accumulating unchecked.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called "game-changing" from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same "which three patents protect the core product" question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Invention disclosure review across multiple material platforms: structured intake built for exactly the problem of pulling patentable work out of engineers across battery, concrete, composite, and sensor teams who don't always recognize their own work as inventive.
- Outside counsel management and cost discipline: a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process. For one R&D client, pairing with a senior attorney matched by technology cut turnaround from six weeks to five days and cost by \$15,000 per utility filing, the kind of budget discipline this role is asked to own directly.
- Portfolio pruning and patent-to-product mapping: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity a pruning decision needs before a patent gets allowed to lapse.

WHERE I STOP

Negotiating IP terms inside a specific commercial or research agreement, running IP due diligence on an acquisition, and litigation or infringement judgment calls, that's legal judgment I don't have and don't claim to. What I can do is make sure the disclosures, the outside counsel relationships, and the portfolio pruning underneath those calls arrive organized.
