

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Senior IP Counsel, Nuro, Mountain View, CA

SUMMARY

IP infrastructure built for exactly what this role owns: running patent harvesting sessions with technical teams and managing outside patent counsel through filing and prosecution at an autonomous vehicle company moving fast.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called “game-changing” from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same “which three patents protect the core product” question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Patent harvesting sessions with technical teams: structured, low-friction intake that meets engineers where they work, the same harvesting-sessions function this role owns, without needing every engineer to already think of themselves as an inventor.
- Outside patent counsel management: a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process, so managing outside counsel on preparing, filing, and prosecuting is a standing process rather than a relationship built firm by firm.
- Patent-to-product mapping: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity useful for an autonomy company tracking which patents cover which part of the stack.

WHERE I STOP

Educating engineers on IP judgment calls in the room and the legal specifics of an invention interview, that's relationship-building and legal judgment I don't have and don't claim to. What I can do is make sure the harvesting sessions and the outside counsel relationships are organized enough that judgment isn't competing with a backlog.
