

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Senior Intellectual Property Counsel, Pacific Fusion, Fremont, CA

SUMMARY

IP infrastructure built for exactly what this role owns: pulling invention disclosures out of R&D and directing outside counsel on prosecution for a fusion energy company whose portfolio is scaling fast.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called “game-changing” from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same “which three patents protect the core product” question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Invention disclosure capture with R&D and engineering: structured intake built for exactly the collaborate-with-R&D-on-invention-disclosures line in this role, so patentable fusion energy work gets drafted before it's buried in a lab notebook.
- Patent-to-product mapping: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity a fast-growing fusion energy portfolio needs as it scales across systems.
- Outside counsel direction at scale: a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process, so directing counsel on preparation, filing, and prosecution is a standing process rather than a relationship managed firm by firm.

WHERE I STOP

IP due diligence on acquisitions, dispute and litigation strategy, and negotiating first-of-a-kind government and commercial deals, that's legal judgment I don't have and don't claim to. What I can do is make sure the patent portfolio and the outside counsel relationships underneath all of that are organized enough that judgment has less paperwork competing for its time.
