

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Associate General Counsel, Span.IO, San Francisco, CA

SUMMARY

IP infrastructure built for the intellectual property slice of a broad Associate General Counsel seat: invention harvesting from engineering and outside patent counsel management, so that one part of the role arrives organized while the rest of the docket gets the AGC's attention.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called “game-changing” from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same “which three patents protect the core product” question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Invention harvesting from hardware and firmware engineering: structured, low-friction intake built because inventive work at a fast-moving hardware company routinely gets missed, the direct match for developing and managing an IP portfolio as your posting names it.
- Outside patent counsel management: a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process, so managing outside counsel on an IP portfolio is a standing process rather than a relationship built firm by firm alongside a broad commercial docket.
- Patent-to-product mapping: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity useful for a hardware company tracking which patents cover which part of its product.

WHERE I STOP

Sales, engineering, and supply-chain contracting, privacy and security review, and the rest of what a broad Associate General Counsel seat covers, that's real generalist legal work I don't do and don't claim to. What I can do is make sure the intellectual property slice, invention capture, prosecution, and outside counsel, arrives organized so it isn't competing for time with the rest of the docket.
