

## TRADESPACE

*The fastest path from invention to filed patent.*

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

---

**Applying for:** Senior Patent Counsel, TAE Technologies, Foothill Ranch, CA

### SUMMARY

IP infrastructure built for exactly what this role owns across four business units: pulling invention disclosures out of engineering and managing outside counsel consistently across fusion, power management, neutron beam, and life sciences instead of one relationship stretched thin.

### RELEVANT EXPERIENCE

**Invention Capture & Portfolio Buildout, Enveda Biosciences** *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called "game-changing" from the first login.

**Portfolio Strategy & Board Reporting, Woodward** *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same "which three patents protect the core product" question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

### CORE CAPABILITIES MAPPED TO THIS ROLE

- Invention harvesting across multiple business units: structured intake built for leading and organizing invention-disclosure efforts across fusion, power management, neutron beam, and life sciences, not just one technology silo.
- Outside counsel management: a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process, the same standing relationship a multi-business-unit portfolio needs instead of one firm stretched across four domains.
- Patentability screening support at volume: AI-assisted prior art and market reporting, so patentability searches keep pace with four active business units actually generating invention disclosures.

### WHERE I STOP

*Serving on the patent committee, assisting inventors through the legal specifics of their disclosures, freedom-to-operate analysis, and litigation-informed claim construction, that's judgment and legal work I don't have and don't claim to. What I can do is make sure invention intake and outside counsel management across four business units doesn't fall behind while that judgment gets exercised.*
