

TRADESPACE

The fastest path from invention to filed patent.

tradespace.io · careers@tradespace.io · Series B to Pre-IPO IP Infrastructure

Applying for: Legal Counsel (Commercial), Vast Space, Long Beach, CA

SUMMARY

IP infrastructure built for the IP portfolio workstream inside a broader Legal Counsel, Commercial seat: invention harvesting from hardware engineering and outside patent counsel management, so that piece arrives organized alongside the rest of the contracts docket.

RELEVANT EXPERIENCE

Invention Capture & Portfolio Buildout, Enveda Biosciences *Series B biotech · small legal team, high R&D velocity*

- Replaced a disclosure process engineers were quietly avoiding with AI-assisted intake that meets inventors where they already work: the direct equivalent of pulling patentable work out of engineers who don't recognize it as inventive.
- Migrated the full legacy portfolio in 30 minutes and became the IP team's system of record from day one, with no separate change-management project required.
- Gave a newly onboarded IP team member a working command center instead of a dependency on outside counsel for basic status checks, called “game-changing” from the first login.

Portfolio Strategy & Board Reporting, Woodward *industrial hardware manufacturer*

- Built patent-to-product mapping and board-ready KPI reporting for a hardware manufacturer transitioning off a legacy docketing system, the same “which three patents protect the core product” question every platform and prosecution effort ultimately has to answer.
- Selected over competing IPMS platforms specifically for configurability and fit with the client's existing product-lifecycle process, rather than for the AI drafting capability that later became the differentiator.

CORE CAPABILITIES MAPPED TO THIS ROLE

- Invention harvesting from space hardware engineering: structured, low-friction intake built because inventive work at a fast-moving hardware company routinely gets missed, the direct match for coordinating patent matters as your posting names it.
- Outside patent counsel management: a vetted network of 235+ patent attorneys across 13 technology practice areas, admitted through a four-criteria review process, so managing outside counsel on filings, maintenance, and enforcement is a standing process rather than a relationship built firm by firm alongside a commercial contracts docket.
- Patent-to-product mapping: at Woodward, an industrial hardware manufacturer, we built patent-to-product mapping so the portfolio could answer which patents protect which product line, the same clarity useful for a space hardware company tracking which patents cover which system.

WHERE I STOP

The commercial contract review, supplier negotiation, and the rest of what a Legal Counsel, Commercial seat covers, that's real generalist legal work I don't do and don't claim to. What I can do is make sure the IP portfolio piece, patents, arrives organized so it isn't competing for time with the rest of the docket.
